Josh mill hill cp school

11/1/18

Yesterday, returning from school holidays, children found craters or metal objects in school field.

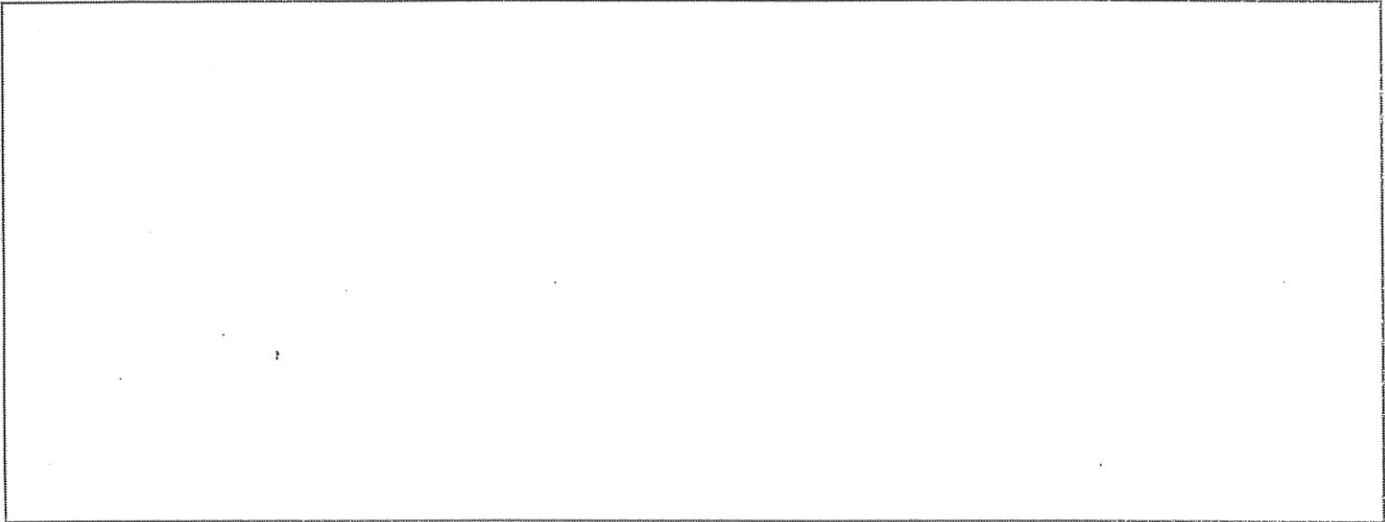

School crater found at school.

On 9th January at mill hill primary school, headteacher (Unknown creature) went to go see the school field and saw an unknown crater.

Speculation around what caused a crater exists. Scientists are predicting an object travelling at 3000 km/hr crashing onto the field.

Mrs Bambridge stated she was shocked and cringed at the site of a hole filled with engine parts and metal objects on her new school field.

Year 1 teacher (Miss
Butter) told children
about "Something strange".
They were both excited
and nervous as they
explored the site.
Many theories are
being discussed as to
what caused this
anomaly. Children
believe that thick
new head could

be an alien!
